## In the Claims

GROUP 3600

Please amend the following claims by deleting the language which is enclosed in brackets "[]" and inserting the language which is underlined "\_\_\_\_\_".

- 1. (Once Amended) A weed extraction apparatus comprising:
- a handle of a linearly elongated cylindrical configuration, having an anterior end opposite a posterior end;
  - a pair of movable claw appendages;
- a linearly elongated lever pivotally mounted to said anterior end by a bolt, said bolt also serving as a fulcrum for said pair of movable claw appendages;

an operating rod of a linear, rod-like configuration which extends parallel along a linear length of the handle and connects to [the]  $\underline{a}$  movable linkage arm pivotally mounted near the posterior end of the handle;

a spring disposed on said bolt and adapted so as to connectively embrace said lever in such a manner whereby said lever is biased to a position extending away from said anterior end of said handle;
